How the Prosperity Code Works

The first referred is assigned to your sponsor.

The 2nd referred pays you the Prosperity Code & Match as qualified.

The 3rd referred pays you all 3 Generations of match (50%, 25%, 25%)

The 4th and on referred pays you the Prosperity Code & Match as qualified.

With each affiliate you refer AKA Sponsor that you're paid the code and match on, their third referred the code is assigned to you. Then that affiliates 3rd the code is assigned to you. Then that affiliates 3rd the code is assigned to you.

This pattern repeats down infinite depth.

On their 3rd referred they instantly get all 3 generations of the matches on the price levels they are active in, and you get the code earnings.

On your 3rd referred, you instantly get all 3 generations of match at the level (s) you're active in on your 3rd referred, the code goes upline.

Prosperity Code Compression

When an affiliate is not qualified to earn a prosperity code commission, the software will look up the enroller tree to find the first affiliate that is qualified at that level.

The qualified affiliate will become the sponsor of that person/affiliate only at that product level, they will earn the code, they will get the pass up, and earn on the match as qualified.

Recapture: In the future if the original sponsor becomes qualified at a higher level, and then the affiliate that went upline engages at that higher level, that affiliate stays with the original sponsor.

They get the code, pass up and 50% 1st gen match if match qualified.

If in the future Fred qualifies at the 250.00 product level (100.00 Code) before Sue does. Fred will be Sue's sponsor at that level once Sue qualifies at the 250.00 product level (100.00 Code).

Prosperity Code Compression

Scenario 1:

Affiliate Fred is only in the matrix. Fred sponsored Sue who is also only in the matrix. At a future date Sue upgrades to the 150.00 product level (50.00 Code), while her sponsor Fred has not.

The software will look upline from Fred in the enroller tree until it finds the first affiliate qualified at the 150.00 product level (50.00 Code), that affiliate/person becomes Sue's sponsor at the 150.00 product level (50.00 Code).

They get the code, pass up and 50% 1st gen match if match qualified.

If in the future Fred qualifies at the 250.00 product level (100.00 Code) before Sue does. Fred will be Sue's sponsor at that level once Sue qualifies at the 250.00 product level (100.00 Code).

Prosperity Code Compression

Scenario 2:

When an affiliate goes from the 150.00 product level (50.00 Code), to the 250.00 product level (100.00 Code), the software will look up the enroller tree for the first affiliate qualified at the 250.00 product level (100.00 Code).

The software will first look to the original sponsor, if qualified at the 250.00 product level (100.00 Code), they will remain the sponsor.

If not qualified, the first upline qualified affiliate will be assigned sponsorship of the affiliate who upgraded to the 250.00 product level (100.00 Code). They get the code, the pass up and the 1st generation match (if match qualified).

If that occurs the original sponsor will not earn the code or matches.

Each product level is in essence its own business.

Affiliate needs to qualify and match rank advance at each product level.

Retail Sales

Affiliate is required to enroll 1 retail customer every 90 days. A retail customer is defined as a person that does not become an affiliate.

All of Prosper Hub products are sold at retail. There is no pricing difference for affiliates.

Maintenance
