Infinite Rewards

Infinite Rewards allows Bitcoin to flow up to you from infinite levels deep.

This is done by what we call “codes and code ups.”

A code aka an Infinite Bitcoin Reward goes up to you from unlimited depth based upon the product sales you're linked to.

Here's how it works.

Once qualified the first person you refer you're paid the code on their purchase.

Infinite Rewards

They get the code on their first referral. Their 2nd referral the code goes up to you (Code Up).

While they do not get the code they instantly get 3 generations of matches (20%, 40%, 10%) on that persons Code earnings.

On your 2nd referral you're instantly qualified on 3 generations of matches while the code goes up to the first qualified rewards member.

From your 3rd and on you earn the code and the matches as qualified.

Infinite Options

1: If Rewards Member has or decides to purchase a product (s):

Your 1st referred pays you the Infinite Reward.

Your 2nd referred is your Code Up

You are instantly qualified to get 3 generations of match 20%/40%/10% on your Code Up. On all other matches you must qualify per the comp plan rules.

Your 3rd and on pays you Infinite Rewards.

Your 1st, 3rd and on Code Up their 2nd to you.

You get the Infinite Rewards, and the referrer gets the matches.

Bitcoin Disclaimer

Bitcoin Rewards are paid daily 7-days a week. Business in one day is paid the next day. Rewards (commissions) are calculated in real time for the exact amount of Bitcoin.

The next day when Bitcoin is paid that exact amount of Bitcoin may have the same dollar value, it might be lower, and it might be higher. As example say on Monday you earn \$100 in Bitcoin. When it's paid to you on Tuesday, it might still be \$100 in Bitcoin, it could be \$97 in Bitcoin, and it could be \$110 in Bitcoin.

Whether it's the same dollar amount as the Reward, lower or higher, you own that Bitcoin and can hold it, convert it to Fiat currency (money), or any of the many options available to you.
